

Why can't I find a specific vendor or product?

Last Modified on 17/02/2026 5:28 am EST

We maintain a very large database, and we're still expanding!

There are a few reasons we might be missing a product you're looking for

- We don't yet have that vendor's catalog in our database
- It's a new product from a vendor we already have a relationship with

In either case, [let us know](#) and we'll reach out to them for their latest catalogs so we can [update our database](#).

Checking if we have a specific vendor

1. Navigate to the products results tab
2. Open the **Company** filter under *Supplier filters*
3. Search the list for your vendor of choice

When you select the vendor, we'll show you all of their products on the platform.

The screenshot displays the BenchSci product search interface. At the top, there is a search bar with the placeholder text "Enter protein/gene target, clone ID, catalog #..." and an example "e.g. 'TLR4 human' or 'PC10 western blot'". Below the search bar, the interface is divided into a left sidebar and a main content area. The sidebar contains a "Filters" section with various categories: Application, Figure Usage Data, Organism Tested, Tissue Used, Cell Type Used, Cell Line Used, Disease, Supplier Filters, Availability, Company (highlighted with a red box), Antibody Specs, and Verification. The main content area shows search results for "Antibody" products. Two results are visible: "Monoclonal Anti-beta-Actin antibody produced in mouse" (Sigma-Aldrich | A5441) with 9043 figures, and "Monoclonal ANTI-FLAG(R) M2 antibody produced in mouse" (Sigma-Aldrich | F1804) with 7525 figures. Each result includes a thumbnail image of the product and a "+ See More" link.

Searching for a specific product

If you are [searching for a specific product](#), simply type the catalog number of the product into the search bar. Clicking the search suggestion will navigate you directly to the product page.
